Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

Location and Setting

The Brickley-Cole House (PG81A-4) is located at 8201 Woodyard Road, just east of its intersection with Old Alexandria Ferry Road in Clinton, Prince George's County. The main house is located at the end of a 1/4-mile gravel driveway on a mostly wooded property and is not visible from Woodyard Road.

Description

The Brickley-Cole House is a three-bay, two-and-one-half-story, gable-roofed masonry brick building with an original one-and-one-half-story wing on the west and a later one-story wing on the east. The exterior is treated with a coating of cement and has been scored to replicate stone blocks at the building corners and around the south entrance. There are east and west gable-end interior parged chimneys, a wooden boxed cornice, and a standing-seam metal roof. The three-bay south façade has a central six-panel door with a rectangular transom. The entrance is beneath a one-bay, one-story, gable-roofed porch with tapered wooden Tuscan columns. Two paired windows with 6/6 double-hung sash and stone sills flank the entrance on the first and second stories. The house has two pedimented dormer windows on the north and south elevations. On the north elevation is a one-story, one-bay, gable-roofed ell with an entrance on the north gable end. There is also an entrance on the north face of the

Continuation Sheet No. 1

PG: 81A-4

east wing. To the north-west of the main house is a two-story, three-bay, gable-roofed brick garage building contemporary with the main house. To the north of the house is non-historic frame shed.

Condition and Alterations/Additions

The house is currently in fair condition. The wooden cornice is in poor condition and is missing in some places. The house has been altered several times over its history. The east wing dates from the 1950s or 1960s and is built of brick. There is wooden scalloped trim below the eaves. The west wing was altered at an unknown date by conversion into a garage, with a large roll-top garage door installed on the north face. Photographs from 1985 indicate that the windows on the south façade once had louvered wooden shutters. These have since been removed. The dormer windows on the north have replaced 1/1 window sash. The heavy iron storm doors on the north and south are not original. The fanlight muntins of the transom above the south door have been removed and replaced with a single pane of glass.

Historical Background

The Brickley-Cole House stands on a part of the historic Bellafonte Farm, originally part of the His Lordship's Kindness estate. The 322-acre farm was purchased in 1931 by John A. Brickley. Brickley developed the Bellafonte subdivision from the surrounding property. In 1933, he built the present Colonial Revival-style main house. In 1948, the house was sold to long-time owner Elsie Cole.

Evaluation

The Brickley-Cole House is not associated with a known event or series of events significant on the local, state, or national level and is not eligible for listing in the National Register of Historic Places (NRHP) under Criterion A.

The Brickley-Cole House is not associated with the life of an individual significant on the local, state, or national level and is not eligible for the NRHP under Criterion B. Little is known of the life and career of its builder John Brickley other than that he subdivided and developed the surrounding farm in the 1930s.

The Brickley-Cole House embodies some characteristics of the Colonial Revival style of domestic architecture of the 1930s. Salient features of this style include the symmetrical disposition of door and window openings across the façade, the central portico above the main entrance, and the use of scored cement to replicate stone around the central door and the building corners.

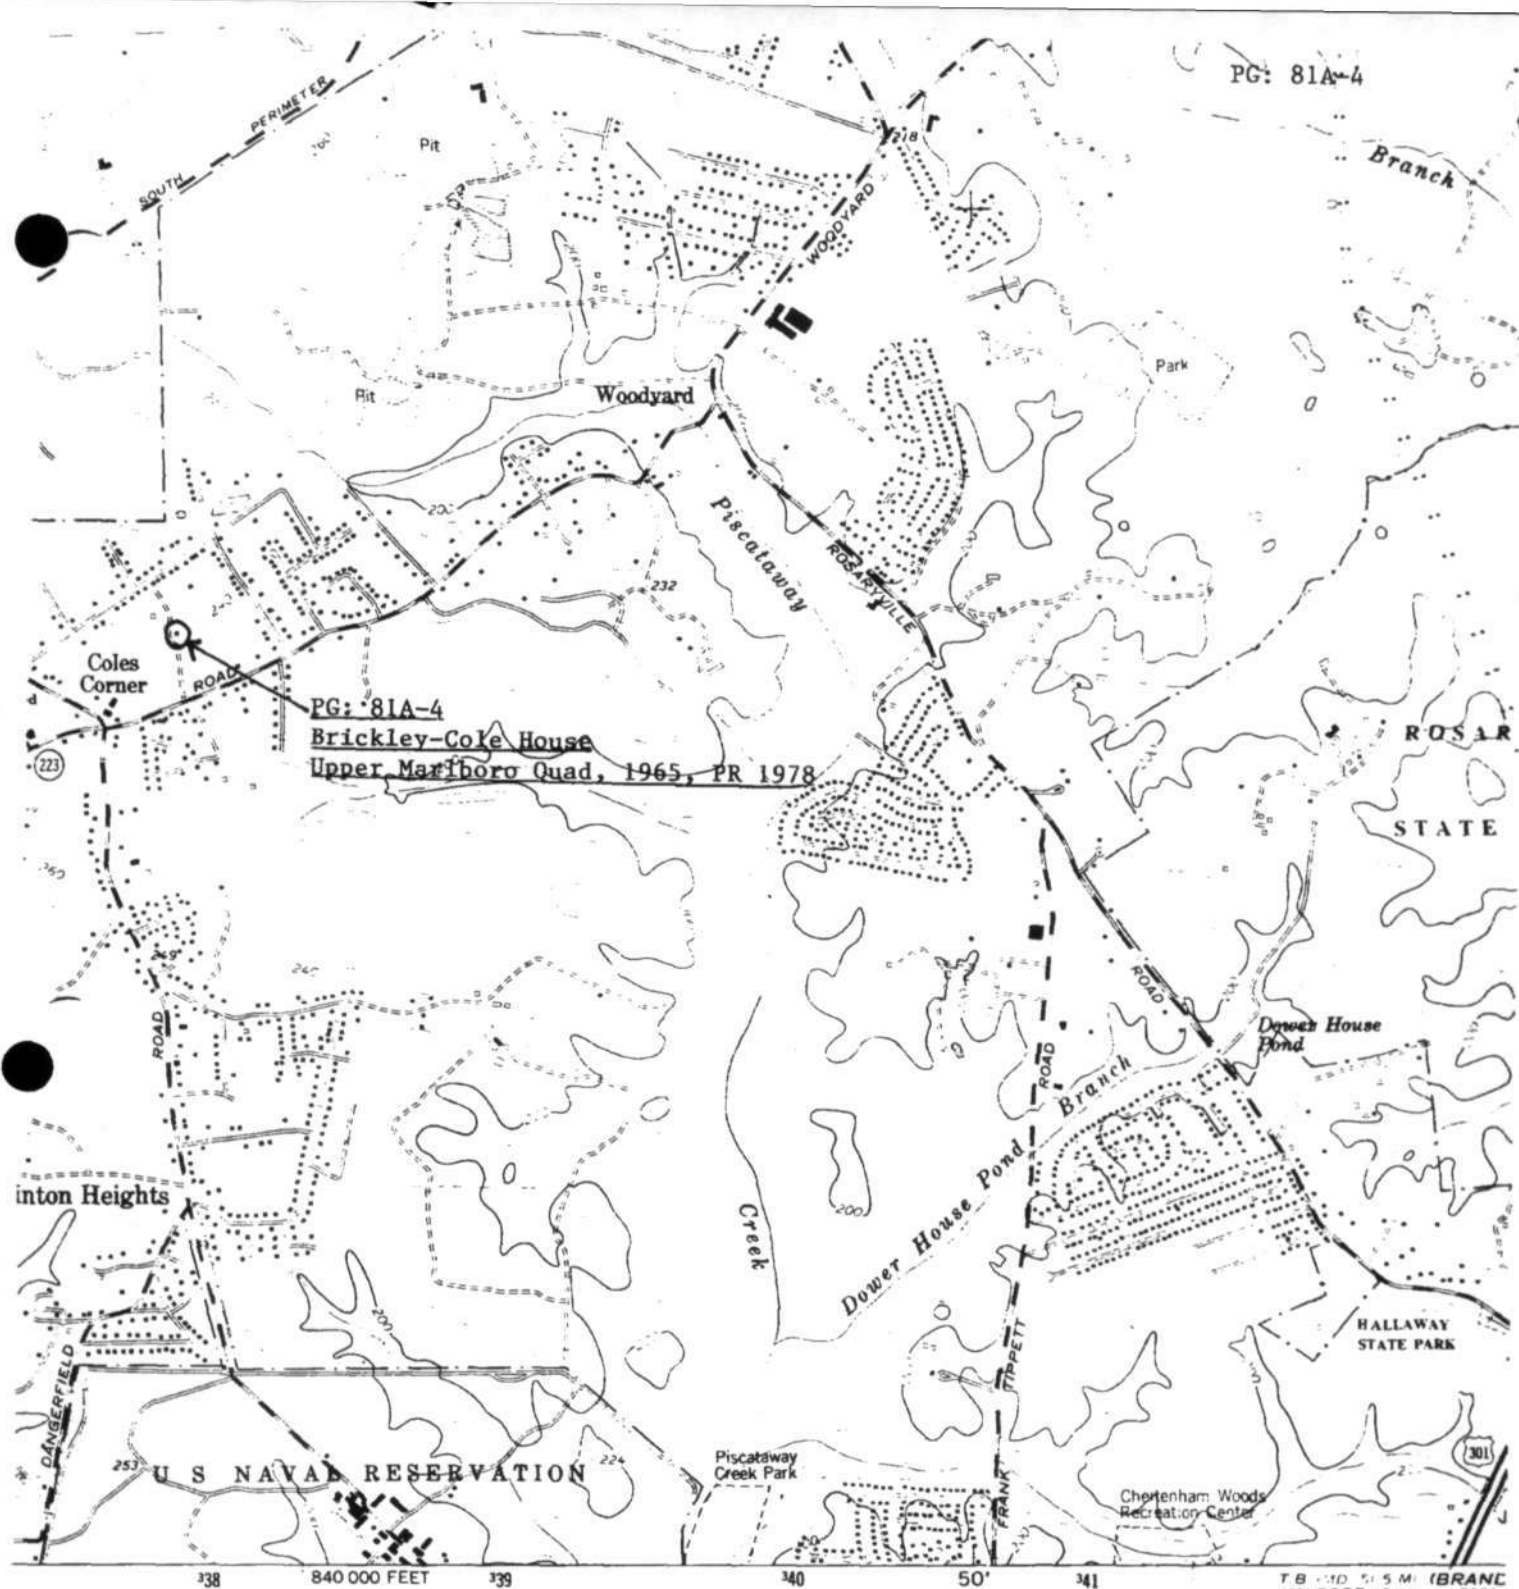

Non-historic alterations and additions to the Brickley-Cole House have affected the building's integrity of design, workmanship, and materials, and have thus diminished its ability to convey its significance as an example of Colonial Revival-style domestic architecture. The building's integrity of design has been affected by the addition of an incompatible east wing whose exterior treatment does not utilize cement as is true of the rest of the building. This wing is built of brick, has scalloped wooden trim, lacks a dormer window, and has windows that are incompatible in scale and design with the rest of the building. Integrity of design has also been affected by the alteration of the west wing into a garage, by inserting a garage door along the entire north face of the wing. Integrity of workmanship has been affected by the removal of window shutters along the south facade, the alteration of the north dormer windows, and the replacement of the original fanlight muntins of the door transom on the south. The deterioration of the wooden box cornice, a character-defining element of the house's style, has affected its integrity of materials. The Brickley-Cole House is not NRHP-eligible under Criterion C.

The Brickley-Cole House is not NRHP-eligible under Criterion D.

PRINCE GEORGE'S COUNTY
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #81A-4 Building Date: 1933

Building Name: Brickley-Cole House (Cole House)

Location: 8201 Woodyard Road, Upper Marlboro, Maryland

Private/Residence/Occupied/Fair/Inaccessible

Description

The Brickley-Cole house is a three-bay, two-story gable roof structure with one-story gable roof wings on the east and west. It is on a hill north of Woodyard Road and is not visible from the road. The cement wall covering is painted white and scored to look like stone blocks. There are east and west gable end interior parged chimneys, a boxed cornice, and standing seam metal roof covering. The three-bay south (entrance) facade has a central, six-panel door with fan light transom. The door is sheltered by a one-bay, one-story canopy porch with tapering slender wood columns. Two double 6/6 windows with stone sills flank the entrance on the first and second stories. There are two pedimented dormers with 6/6 windows on both the north and south roof slopes. The four-bay north (rear) facade faces a cement patio.

Significance

The Brickley-Cole house was built in 1933 by John A. Brickley, real estate developer and broker. Brickley acquired the 322-acre farm called Bellefonte, originally a part of the His Lordship's Kindness estate. The Daingerfield family, who owned the His Lordship's Kindness estate beginning in 1860, owned the adjoining Bellefonte farm until heirs sold it to Brickley in 1931. Brickley built the nine room brick dwelling and subdivided and sold the 322 acre property. The present owner, Elsie Cole, has owned the house since 1948. The house was Georgian Revival stylistic elements including a fanlight transom, slender classical porch columns, pedimented porch roof and dormers, and a cement-over-brick wall treatment, scored to look like stone blocks.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Brickley-Cole House is a three-bay, two-story, gable roof brick structure with one-story gable roof wings on the east and west. The house is situated on a hill north of Woodyard Road, and faces south. It is not visible from the road.

The wall covering is cement, painted white and scored to look like stone blocks. There are interior chimneys at the east and west gable ends, breaking the cornice line, with the same wall treatment. There is a wide boxed cornice with crown molding throughout the building. The roof is covered with standing seam metal, painted black. The foundation is not visible because the wall treatment continues down to the ground surface. There are basement windows in wells on the north and south facades.

Entrance is in the central bay of the three-bay main south facade, through a six panel door with fanlight. Two double 6/6 windows flank the entrance. There are two double 6/6 windows with louvered shutters on the second story. The windows throughout the structure have wide stone sills, painted white. There are two pedimented dormers, with a 6/6 window in each, above the first and third bay. A one-story canopy porch shelters the central entrance. The porch roof has a wide, plain frieze on the east and west sides and a plain raking cornice with cornice returns but no pediment, in the gable. The gable is left open to create a pointed-arch roof over the entrance door, and this roof is supported on two tapering wood columns surmounted by plain capitals.

The west facade of the main block is dominated by the one-story gable roof west wing, which appears to be contemporary with the main structure. The south (main) facade of this west wing has a pedimented dormer with a 6/6 sash window and two 6/6 windows on the body of the building. Its west gable end is one bay, with one 6/6 window, and a returned cornice. The north side of this wing is filled by a two-car wooden garage door that appears to be a later addition. The wall surface treatment is the same as that of the main block.

The north (rear) facade of the main block has two pedimented dormers with 1/1 windows. There are four bays on the main structure, with a 15-light glazed entrance door in the second bay and double 6/6 windows in the fourth bay. There is a one-story, gable roofed projecting bay at the northwest corner of the main structure, with an entrance and a four-light window on its north gable end. The north facade faces a concrete patio and the back yard.

The east facade has two second story 6/6 windows. The first story is covered by a one-story gable-roofed wing that appears to be a later

STATE HISTORIC SITES INVENTORY FORM

Survey No. PG-81A-4

Description (continued)

Section 7 Page 2

addition to the building. This wing is the same size as the one-story west wing and balances the facade. It is constructed of grey brick and has the same roof covering as the main block. It has a plain cornice with cornice returns in the east gable end. Below the cornice is a decorative course of white vertical wood siding with scalloped ends. This addition has a large modern 24-light window on its south (front) facade.

Tall telephone poles spaced at regular intervals encircle the house. They are topped by antenna-like structures. According to the owner, the FBI used the site and constructed the pole system during World War II.

There is a large brick, two-story, three-bay garage to the north of the house. It has a gable roof covered with standing-seam metal. There appears to be an apartment or living quarters over the garage.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Brickley-Cole House was built in 1933 by John A. Brickley, a real estate developer and broker.¹ The property was part of the 322-acre farm called Bellefonte, originally a part of the His Lordship's Kindness estate. A large acreage had been owned by the Dangerfield family including parts of His Lordship's Kindness and Bellefonte Farm since 1860. Bellefonte was sold by Dangerfield heirs to Brickley in 1931.² Brickley built the nine room brick house and lived there during 1933 and 1934 while he was in the process of subdividing the Bellefonte Farm and selling lots. The Brickley-Cole House was left on a 32.76 acre lot which Brickley sold in 1939. The present owner, Elsie Cole, purchased the property in 1948.

The house is quite substantial in size, constructed in the Georgian Revival style. Stylistic elements include a symmetrical facade, fanlight transom, slender classical porch columns, pedimented dormers, and a cement-over-brick wall treatment scored to look like stone blocks. The east wing, enclosed since 1948 using inappropriate brick and frame materials, originally was a sun porch.

The knoll on which the dwelling stands is surrounded by 6 high telephone poles surmounted antenna. According to the owner, the FBI leased the property during World War II and installed the poles and antennas for use as a communications center. The formation of poles is called a CDAA, a circularly deployed antenna array.³

The Maryland Historic Sites Inventory was officially created by an Act of the Maryland Legislature to be found in the Annotated Code of Maryland, Article 41, Section 181 KA, 1974 supplement.

The survey and inventory are being prepared for information and record purposes only and do not constitute any infringement of individual property rights.

7. Continued

The east facade has two second story 6/6 windows. The first story is covered by a one-story gable-roofed wing. It is constructed of grey brick and has the same roof covering as the main structure. It has a plain cornice with cornice returns in the east gable end. Below the cornice is a decorative course of white vertical wood siding with scalloped ends. This addition has a large modern 24-light window on its south (front) facade.

Tall telephone poles spaced at regular intervals encircle the house. They are topped by antenna-like structures. According to the owner, the FBI used the site and constructed the pole system during World War II.

There is a large brick, two-story, three-bay garage to the north of the house. It has a gable roof covered with standing-seam metal. There appears to be an apartment or living quarters over the garage.

Cole House
P.G. #81A-4

910:235
20 Sept. 1948
Deed

Raymond L. Dillman and Cecilia Dillman, his wife, to Elsie H. Cole, part of John A. Brickley's Subdivision known as "Belle Fonte," Surratts District, including lots 68 to 75, 60 and 61, also parts of Lots 57, 58, and 59, being all the same property obtained by #547:61.

547:61
4 Dec. 1939
Deed

John A. Brickley, Incorporated, to Raymond L. Dillman and Cecilia Dillman, his wife, 32.76 acres of land, part of John A. Brickley's subdivision known as "Belle Fonte," Surratts District, including Lots 68 to 73, 60 and 61, also part of Lots 57, 58, and 59 subject to covenants (including covenant #7 which states a 9-room dwelling now exists on the premises) being the same land Brickley obtained by #373:125.

373:125
20 June 1931
Deed

Philip Barton Key Daingerfield and Elsie Agnus Daingerfield, his wife, to John A. Brickely, 322-1/4 acres being the same tract by conveyed by George H. Calvert to Henry Daingerfield by EWB #1:82; first tract conveyed by Harry Daingerfield to Susan S. Daingerfield and Ellen C. Daingerfield by FS #1:77; Susan S. Daingerfield, in contemplation of marriage with a certain John S. Barbour, executed a deed of trust of all her property to Henry Daingerfield by FS #3:322. Barbour by his last will and testament WTD #1:485 devised the property known as "Belfonte," to his sister-in-law, Ellen C. Daingerfield, she already owning a 1/2 interest. Susan S. Barbour (d) 1866 in her last will and testament WTD #2:87 devised all her property to husband for life with remainder to sister, Ellen C. Daingerfield. Being also the same tract by deed dated 19 May, 1931 and recorded among Land Records on 25 May, 1931, was granted and conveyed by Richard C. Thompson, et al., Assignees, to said Philip Barton Key Daingerfield.

DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

The house is a two story, stuccoed, brick structure with a three bay main (south) facade. At either end are flush gable chimneys. On each slope, the roof has two dormers. To the west is a one story, two bay wing.

The house has been altered extensively or rebuilt. Some of the details--such as the door panels--appear to suggest alteration rather than rebuilding.
